Alarm.com Launches emPower™ Automation and Remote Energy Management Solution for Homes and Businesses

Feature-rich and easy-to-use solution enables consumers to remotely monitor and control lights, locks and thermostats and manage energy consumption at their properties

Vienna, Virginia – June 15, 2010 – Alarm.com, the security industry leader in wireless, web and mobile security and monitoring technology, today announced the launch of emPower, its new automation and energy management solution for homes and businesses. emPower allows end-users to easily monitor and control their thermostats, locks and lighting remotely and is fully integrated with Alarm.com's wireless alarm signaling and interactive security services.

With emPower, consumers can use the Alarm.com website and mobile apps to:
- Remotely monitor and change their thermostat settings
- Lock and unlock doors, even when far away
- Automate light schedules to deter intruders and fit their personal lifestyle
- Set energy efficient thermostat and light schedules that can integrate with their security system
- Automatically set light, lock and thermostat settings throughout the property when the security system is armed or disarmed

With emPower, Alarm.com customers can also receive real-time email and text message notifications when a thermostat setting is changed or a specific door lock is accessed. emPower is built on Alarm.com's proven security technology platform and supports all of the critical systems at a customer's property in one complete, integrated solution.

"Since Alarm.com's inception ten years ago, we've focused on building a very robust and flexible remote monitoring and control platform that could expand beyond security to support other mission critical applications in the home or business," said Alison Slavin, Alarm.com's Vice President of Product Management. "emPower is fully integrated with Alarm.com's interactive security platform and is designed to meet the needs of anyone looking to reduce their energy consumption and have greater control of their property's critical systems from afar."

Alarm.com's new emPower services will be available through Alarm.com authorized dealers in the United States and Canada. For more information about Alarm.com emPower, visit www.alarm.com/empower.
