

Device Design Engineer

Washington D.C. Area (Vienna, VA)

A rapidly expanding, entrepreneurial technology company, Alarm.com, is seeking an ambitious, talented, entry-level Device Design Engineer with a B.A., B.S. or M.S. in Computer Science, Computer Engineering, Electrical Engineering or a similar engineering program.

- Alarm.com provides web-enabled, wireless security, safety and activity monitoring technology to residential and commercial customers throughout the United States and Canada. Our patented technology is already used by hundreds of thousands of residential and small commercial customers.
- Alarm.com's Engineering team is perfect for candidates who want to gain exposure to a wide variety of technologies including GSM wireless RF networks, intelligent video analysis, device firmware, home automation, web application development, e-commerce applications, and large scale, mission critical database application development.
- Very few small companies innovate and develop across such a broad range of technologies as Alarm.com. This position is ideal for the candidate who seeks a small, friendly company culture where one can work closely with a few smart and highly productive people across a very interesting spectrum of wireless, software, and hardware/device technologies to develop outstanding consumer products.

JOB REQUIREMENTS

- B.A. or B.S. Electrical Engineering, Computer Engineering, or Computer Science, MS is a plus. (Liberal arts academic experience or interests is also a plus.)
- Academic or commercial experience in development with microcontrollers, sensing devices, and embedded software
- Skilled in hardware design, engineering, integration, and mathematics
- Self-starter, analytical, tenacious problem solver
- Strong verbal and written communication skills
- Rigorous attention to detail with focus on robustness, scalability, and quality of products
- Passion for working with technology and excitement for creating high quality consumer technology products
